AquADEKs® Pediatric Liquid
(aqua-dex®) Antioxidant Multivitamin and Mineral Supplement

KEY FACTS
- Formulated to meet cystic fibrosis nutritional guidelines and the latest scientific evidence*
- Safely and effectively increases plasma levels of fat-soluble nutrients and antioxidants*
- Contains important antioxidants which reduce oxidative stress in the body*
- Enhanced vitamin D and K levels for improved bone health* (AquADEKs® Pediatric Liquid vs. ADEKS® Pediatric Drops)
- Great tasting natural cherry flavor
- Independently Tested and Quality Assured

BRIEF SUMMARY OF PRODUCT INFORMATION
AquADEKs® Pediatric Liquid is a complete nutritional supplement specifically designed to meet the needs of cystic fibrosis (CF) patients and those who have difficulty absorbing fat-soluble vitamins and nutrients.* AquADEKs® uses microsphere technology to enhance the absorption of this antioxidant multivitamin and mineral supplement.* Formulated to meet the consensus nutritional guidelines for CF and incorporating the latest scientific evidence, AquADEKs® Pediatric Liquid contains important antioxidants, such as coenzyme Q10, beta-carotene, and gamma-tocopherol (a component of the mixed tocopherols). Research indicates that CF patients have lower than normal levels of these antioxidants which can lead to increased oxidative damage. This product also contains enhanced vitamin D and K levels to support improved bone health. In addition, AquADEKs® Pediatric Liquid contains selenium, which is an essential cofactor for the body’s own antioxidant system, and zinc, which has been shown to be deficient in CF patients.*

AquADEKs® forms micellar-like spheres that provide fat-soluble vitamins in a form that can be readily absorbed even when there is impaired digestion or impaired liver function.* Usage Information AquADEKs® Pediatric Liquid may be used to supplement levels of the fat-soluble vitamins A, D, E, and K and other essential antioxidants and nutrients in infants and children who do not absorb sufficient amounts from their diets.* Pharmacology Deficiencies of one or more fat-soluble vitamins may occur in individuals whose diets are deficient in these vitamins or who for any number of reasons have difficulty in absorbing fats from their diets. Any condition that diminishes the function of the pancreas, the liver, or the digestive system, can cause malabsorption. Fat-soluble vitamins can only be absorbed after they are incorporated into micelles through the actions of the body’s bile and pancreatic secretions. These micelles are spherical particles that have lipophilic (fat-loving) interiors encapsulated by hydrophilic (water-loving) exteriors that facilitate absorption of fat-soluble vitamins in the body.*

*These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure, or prevent any disease.

SAFETY
Safety sealed for your protection. Do not use if seal is broken or missing. Keep out of reach of children.

CONTRAINDICATIONS
Do not take this product if you have a known sensitivity or allergy to any of the components.
Vitamin K interferes with the actions of anticoagulant therapy, persons taking anticoagulant medications should consult their physician before taking AquADEKs® Pediatric Liquid.
DOSAGE AND ADMINISTRATION

Recommended dosage:
Age 0-12 months . . . . . . . . . . . . . . . . . . . . . . . . . 1 ml daily
Age 1-3 years . . . . . . . . . . . . . . . . . . . . . . . . . . . . 2 ml daily
or as directed by a physician.

Shake well before each use.

Take with food to reduce the risk of upset stomach.
